DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 21 recites the limitation "second starting position" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6-9, 20, 24-26 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (5,105,730). See col. 3, line 46 to col. 4, line 10, **32** for the hollow bodies, **34** for the roller-type louver, **26** and **28** for drive and return shafts. Regarding the pivotal cover, see **42** and **44**. Regarding claim 9, see **14**. Regarding claim 20, see fig. **2a**. Regarding claims 24 and 25, see **14**.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith in view of Le (6,695,691). Smith discloses all of the limitations of the claim(s) except for the drive shaft having a pivotal sleeve. Le discloses the presence of a drive shaft having a pivotal sleeve. See **150**. Hence, one skilled in the art would find it obvious to modify the system of Smith to include the drive shaft having a pivotal sleeve of Le for the purpose of axle protection. Regarding claim 4, movable element, see **142**. Regarding claim 5, see **16**.

Regarding claims 12-19, 22, 23, and 26-28, Applicant claims a combination that only unites old elements with no change in the respective functions of those old elements, and the combination of those elements yields predictable results; absent evidence that the modifications necessary to effect the combination of elements is uniquely challenging or difficult for one of ordinary skill in the art, the claim is unpatentable as obvious under 35 U.S.C. 103(a). *Ex Parte Smith*, 83 USPQ2d at 1518-19 (BPAI, 2007) (citing *KSR*, 127 S.Ct. at 1740, 82 USPQ2d at 1396). Accordingly, since the applicant[s] have submitted no persuasive evidence that the combination of the above elements is uniquely challenging or difficult for one of ordinary skill in the art, the claim is unpatentable as obvious under 35 U.S.C. 103(a) because it is no more than the predictable use of prior art elements according to their established functions resulting in the simple substitution of one known element for another or the mere application of a known technique to a piece of prior art ready for improvement.

Allowable Subject Matter

Art Unit: 3749

Claims 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
